

Garment Dispensers/Collector

For distribution and collection of workwear

Probe

Workwear lockers

The managed issue of workplace clothing - often via third party laundries - is an essential part of hygiene procedure in many sectors.

Designed initially for work wear, these lockers are equally suitable for the controlled issue of safety equipment, consumables or specific materials required for a working day or shift.

Individual Access Garment issue lockers provide each worker with key access to their secure compartment to collect a freshly laundered issue of clothing. Compartment doors are inset within the main full-height door, which remains locked.

Convenient Resupply The full-height main door allows access to all of the individual compartments for restocking with laundered clothing.

Laundry Collection Workers 'post' their used garments into an adjacent Collection locker. These are collected in a laundry bag (not supplied with lockers). This separation of clean and used items can make a major contribution to maintaining a hygienic working environment.

AC+IVE COAT

All painted components are protected with a powder coating which incorporates ActiveCoat anti-bacterial technology.

ActiveCoat has been tested by an Internationally recognised microbiological testing laboratory for antibacterial performance, against the most widely encountered and problematic organisms including the MRSA Super bug and E-coli. These micro-organisms suffered a 99.9% reduction in population.

Important note regarding locker installations

Wherever possible lockers should be secured to ensure stability. Single lockers should ideally be fixed back to a wall. Runs of lockers should be fixed together side-to-side and either fixed back to a wall or fixed back-to-back to another run of lockers.

The range

Collector locker

Full-height door with galvanised anti-theft shelf, angled inside 'post slot'. Fitted with hooks for laundry collection sack (sack not included).

Height - 1800mm	
Width mm	Depth mm
